

What is NLP?

Natural language processing (NLP) is a subfield of linguistics, computer science, information engineering, and artificial intelligence concerned with the interactions between computers and human (natural) languages, in particular how to program computers to process and analyze large amounts of natural language data.

I've been searching for the right words to thank you for this breather. I promise i wont take your help for granted and will fulfil my promise. You have been wonderful and a blessing at all times.

I HAVE A DATE ON SUNDAY WITH WILL!!.

Quotes

What you don't use you lose.

First, solve the problem. Then, write the code.

Fix the cause, not the symptom.

Simplicity is the soul of efficiency.

Good design adds value faster than it adds cost.

In theory, theory and practice are the same. In practice, they're not.

There are two ways of constructing a software design.

One way is to make it so simple that there are obviously no deficiencies.

And the other way is to make it so complicated that there are no obvious deficiencies.
